CITI

LOUNGE CHAIR

Citi is a lounge chair built around one simple idea: a comfortable seat on a frame that barely takes up space. Panel-tufted upholstery, in leather or a fabric of your choice, wraps a deep, softly reclined seat and back, carried on a slim flat steel bar that bends into a single sled base. It sits as easily by a bedroom window or in a reading corner as it does in a lobby, office lounge or hotel suite.

DETAILS

HIGH-DENSITY FOAM

Non-powdering, high-density PU foam keeps the seat firm and supportive. It holds its shape over the years instead of sagging or crumbling.

FLAT STEEL BAR FRAME

Solid flat steel bar is bent into a continuous sled base. Strong and stable, yet visually light, in a matte black powder-coated finish.

PANEL TUFTING

Stitched panels across the seat and back keep the padding evenly in place and give Citi its tailored, structured look.

PADDED ARMRESTS

Upholstered armrest pads sit over the steel frame, so the arms are soft to the touch where your hands rest.
